# VP 2500

VP Centrifugal Pumps are designed for maximum durability and a long service life in the most demanding applications. We build them to handle high volumes, delivering flow rates that can go up to 7500 GPM and push fluids up to 540 feet of head pressure. These pumps are purpose-built for continuous operation with minimal maintenance.

- Heavy Duty Shaft
- Advanced Impeller Design
- Premium Bearings
- Versatile Sealing Options
- Easy Maintenance

VP offers direct replacement solutions for the well-known Mission XP 14x12x22 and 10x12x23 centrifugal pumps.

## WHEN VP MEETS THE XP

Certified technicians fully assemble VP XP Centrifugal Pumps, making sure you receive a high-quality piece of equipment that's ready to perform.

They're ideal for a wide range of demanding applications, including sand slurry, supply boat mud transfer, blending, food processing, and handling various waste slurries.

- Low Stuffing Box Pressure
- Casing Flow Divider
- 4340 Heat Treated Shaft
- 416 SS Shaft Sleeve
- 26% High Chrome Components
