# H1 FLUID END

After years of experience and field results, no company understands the demands of the Frac Market better than VP. As pressures climb and proppants increase, the market demands longer life and a stronger fluid end. Meet the H1 Fluid End by VP.

**15-5 Stainless Steel**

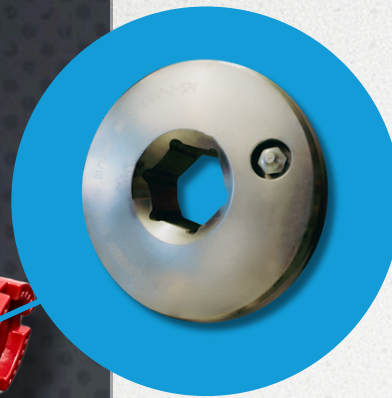

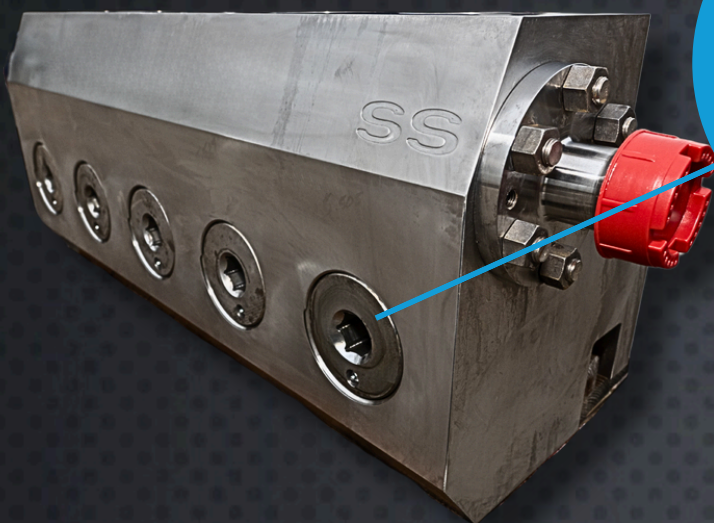

**Packing Nut Locks**

**Optimized Bore Designs**

Proprietary bore configuration and surface treatment reduces stress cracks, improves flow characteristics, and extends the overall life of the fluid end.

## GREASEABLE RETAINER NUTS

**ADDITIONAL SAFETY  
FEATURES**

- Reduces Seizure
- Easier Removal
- Drastically improves safety during maintenance
