

PUMP SERVICE

VP has fully operational service hubs in the Permian Basin, Eagle Ford Basin, and Haynesville Basin, right where your work happens. That means less waiting, **less downtime**, and more face-to-face support from people who know how to fix a problem. We keep critical parts on the shelf and **field-experienced techs** on the ground, ready to troubleshoot, repair, or **rebuild on short notice**. Whether it's planned maintenance or a mid-job failure, we're here to respond fast and deliver the right solution the first time.

WHAT YOU GET IN BASIN

- Full service centers with tear-down, rebuild, and hydrostatic testing capabilities
- Service technicians with real field experience
- Local inventory of frac and drilling components
- Quick-turn repairs and pump rebuilds
- Troubleshooting, inspection, and on-site equipment diagnostics
- Emergency response

CENTRIFUGAL PUMP REPAIRS

Whether it's a 3 AM failure or a hot job that can't afford delays, we've got your back. Call your nearest VP facility, and we'll get the parts moving, the techs on it, and the job back on track.

Keeps your centrifugal pumps maintained, safe, and ready at all times.

- Gardner Denver (10×12, 5×6, 4×5)
- Gorman Rupp (12×12, 12×10)
- Mission Magnum (14×12, 12×10)
